Name(s) of Contractors being used: _____

Details of proposed changes: _____

Attach another page if necessary. **Please attach a drawing of proposed changes, if possible.**

If Board of Directors approves your request, the following conditions will apply:

- A licensed and insured contractor must be used to complete the addition or alteration to the common elements/unit. The Owner assumes all liability for their contractor/trade and their performance. The owner is responsible for ensuring the safety of the work on site, including ensuring that the responsibilities of the Occupational Health and Safety Act, Regulations and Code are followed on site.

- All work must be done to a professional standard and must meet current Building Code requirements. All required Permits, Locates and Inspections must be obtained within the appropriate timeframe and at the Owner's expense. All electrical work must be inspected upon completion and a report must be submitted to the property manager.
- Construction materials and supplies are not permitted to be stored on common property, including the front and back yards, balconies and parking spaces. The Owner is responsible for the cleanup of materials and debris in all common areas. All refuse and unused materials must be disposed of offsite at the Owner's cost.
- The Owner and any successive owners of the condo unit will have ownership of, and will be solely responsible for the installation, maintenance in a first-class condition, repairs to and insurance of the addition or alteration to the common elements/unit and for all the costs associated therewith.
- If the Owner or any successive owner of the condo unit breaches his/her obligations hereunder, the Board can require the Owner to remedy the breach, which may include requiring the Owner to remove addition or alteration to the common elements/units at the sole expense of the Owner.
- Any and all costs, charges, damages or expenses, including legal costs, incurred by the Corporation as a result of the addition or alteration to the common elements/unit shall be paid by the Owner or any successive owners within twenty (20) days of being billed for same. These costs are deemed to be common expenses attributable to the Unit, and would be recoverable pursuant to the Condominium Act (1998) as amended.
- All installations including, but not limited to, piping and venting must be done at the back of the unit, in the exclusive use common element area. No piping/venting, etc., is permitted on the side of the unit.
- Natural gas lines (and other utilities) should be run underground to the home wherever possible, and any grounds repair required following the installation is the sole responsibility of the owner, not the corporation. Natural gas lines may not be attached to the privacy fences in any way. A plan from the HVAC contractor doing the conversion showing how the servicing to the unit is to be accomplished should be submitted with the application for approval.
- Work must be completed between the hours of 8:30 am and 7:00 pm if the noise generated from such work could reasonably cause disruption or annoyance to other residents.

Depending on the nature of your request, other conditions could apply as well. Details will be provided upon the approval of your request.

I acknowledge that I have read and understand the contents of this application form. I certify that the information provided on this application is accurate. I agree that, if my application is approved, I will comply with all conditions and requirements outlined in this document.
